

BEHIND THE MRI: DR. RAYMOND DAMADIAN

BEHIND THE MRI: DR. RAYMOND DAMADIAN

The MRI scanner has revolutionized the field of Medical Science. In 1977, Dr. Raymond Damadian invented the MRI scanner. The recipient of the 2001 Lemelson MIT achievement award, and the 1988 National Medal of Technology from President Ronald Reagan, his name stands among those of the greatest inventors in the National Inventors Hall of Fame. Join us in this rare personal interview of Dr. Damadian as he describes the invention and comments on multiple scientific controversies related to the origin of life. His answers will surprise you and leave you pondering your own worldview. See amazing Medical MRI images and state of the art animations. Expand your mind.
